PERSONAL PROFILE

A motivated Information Technology graduate with a Bachelor of Business Information Technology, from Mount Kenya University. My academic and practical experience has developed my interest in Cybersecurity, Digital Forensics, Information Security, Cybercrime Prevention, and Secure Digital Transformation.

I have gained practical exposure to ICT support, information systems, digital operations, records management, user support, basic networking, and technology enabled service delivery through industrial attachment, internship, and academic projects.

I am particularly interested in how East African countries can strengthen cybersecurity capacity, protect critical digital infrastructure, address cybercrime, and develop secure digital systems that support regional integration, economic development, innovation, and sustainable development.

I intend to further develop my academic and professional expertise in cybersecurity and digital forensics and apply this knowledge to support Kenya and the wider East African Community (EAC).

EDUCATIONAL BACKGROUND

Open University of Kenya (OUK) Sept 2026

Master of Science in Cybersecurity and Digital Forensics (In Progress)

Mount Kenya University (MKU) 2022 – 2025

Bachelor of Business Information Technology

Relevant Areas of Study:

- Information Systems
- Database Management Systems
- Computer Networks
- Systems Analysis and Design
- Software Engineering
- Information Security
- ICT Project Management
- E-Commerce
- Business Intelligence

PROFESSIONAL AND PRACTICAL EXPERIENCE

ICT Intern - Migori County Assembly January 2026 – April 2025

During my internship, I gained practical exposure to ICT operations and information management within a public-sector environment.

Key responsibilities and experience:

- Assisted with ICT support and day-to-day digital operations.
- Supported information management and records administration.
- Participated in troubleshooting and user support activities.
- Assisted in the effective utilization of ICT resources and systems.
- Gained experience working within an institutional and public-service environment.

ICT Attachee - Mabera Technical and Vocational College (Mabera TVC)

September 2025 – December 2025

- Provided basic technical support to staff and students.
- Assisted with installation and configuration of software applications and device drivers.
- Troubleshoot basic computer hardware and software problems.
- Supported internet connectivity and basic network administration.
- Assisted with antivirus updates and routine system maintenance.
- Supported email configuration and user account-related activities.
- Assisted with data backup procedures and basic information management.
- Developed practical problem-solving and user-support skills.

Election Clerk - Independent Electoral and Boundaries Commission (IEBC)

2022 General Election

- Assisted in voter identification and verification processes.
- Maintained accuracy and confidentiality when handling electoral information.
- Supported election operations and data management activities.
- Worked within established procedures and strict operational timelines.
- Developed experience in responsibility, integrity, teamwork, and handling sensitive information.

ACADEMIC PROJECT

Undergraduate Project – Web Based Information Management System

Developed a web based information management system designed to support digital information dissemination and user engagement.

The project provided practical experience in:

- Systems analysis and design
- Database management
- Web-based software development
- Information management
- Problem solving
- User-oriented system development
- Applying ICT to address organizational communication needs

The project strengthened my understanding of how digital systems can improve information accessibility, communication, and service delivery within institutions.

RESEARCH INTERESTS

My primary research interests are in areas that address emerging digital security challenges in Kenya and the East African region, including:

- Cybersecurity

- Digital Forensics
- Cybercrime Prevention
- Digital Evidence Analysis
- Information Security Governance
- Cyber Threat Intelligence
- Network Security
- Cybersecurity Policy and Risk Management
- Secure Digital Transformation
- Protection of Digital Infrastructure

I am particularly interested in research that can contribute to practical approaches for preventing cybercrime, strengthening digital resilience, protecting digital evidence, and improving cybersecurity cooperation among East African countries.

DEVELOPMENT INTEREST

The increasing digitalization of government, financial services, businesses, education, healthcare, and other sectors across East Africa creates significant opportunities for regional development. At the same time, it increases the need for stronger cybersecurity capacity and coordinated approaches to cyber threats.

My long-term interest is to contribute to the development of secure and resilient digital systems within the East African Community.

Through further academic training and research, I hope to contribute to:

- Strengthening cybersecurity capacity within the region.
- Supporting the protection of digital infrastructure and information systems.
- Contributing to effective prevention and investigation of cybercrime.
- Promoting responsible handling and analysis of digital evidence.
- Supporting cybersecurity awareness and capacity building.
- Encouraging secure digital transformation across East African institutions.
- Contributing to regional cooperation in addressing cross border cyber threats.
- Supporting technology-driven economic growth and sustainable development.

I believe that stronger regional cooperation in cybersecurity and digital security can support the broader objectives of EAC regional integration and development.

TECHNICAL COMPETENCIES

- Information Systems Management
- ICT User Support
- Computer Hardware and Software Support
- Microsoft Office Applications
- Database Fundamentals
- Data Management
- Digital Records Management
- Internet and Email Administration
- Basic Network Troubleshooting
- Software Installation and Configuration
- Basic Information Security Practices
- Web-Based Information Systems

- Basic Systems Analysis and Design

PROFESSIONAL AND PERSONAL ATTRIBUTES

- Analytical thinking
- Problem solving
- Research interest and curiosity
- Teamwork and collaboration
- Communication skills
- Adaptability and flexibility
- Integrity and professionalism
- Time management
- Responsibility and confidentiality
- Commitment to continuous learning
- Leadership potential

CAREER AND ACADEMIC ASPIRATION

My long term aspiration is to become a Cybersecurity and Digital Forensics professional and researcher, contributing to the protection of digital systems, prevention of cybercrime, digital evidence analysis, and development of secure digital infrastructure.

Through advanced academic training, I seek to deepen my knowledge and practical capabilities in cybersecurity and digital forensics and use this expertise to contribute to Kenya and the East African Community.

I aspire to participate in research, innovation, capacity building, and regional initiatives that strengthen cyber resilience and support secure digital transformation across East Africa.

COMMUNITY AND PUBLIC-SERVICE EXPOSURE

My experience working with public institutions, including Migori County Assembly and the Independent Electoral and Boundaries Commission, has exposed me to environments where information accuracy, confidentiality, accountability, and effective service delivery are important.

These experiences have strengthened my interest in using ICT not only as a technical tool but also as a means of improving public services, institutional efficiency, information management, and development.
